HAMPTON INN

GETTYSBURG, PA

Brechbill & Helman worked closely with the architects in formulating a design that would maximize usage of a long, narrow and irregular site for this new Hampton Inn. The four-story, 49,535 SF facility has 79 units and meets all NFPA, BOCA, Life Safety, ADA and state-local code requirements. Higher than normal precipitation preceding construction called for increased job coordination by the B&H building team due to the load-bearing masonry and pre-cast construction. Numerous facility amenities include a sit down breakfast area off the main lobby and a large, glass enclosed indoor swimming pool complete with whirlpool.

*"Brechbill and Helman Construction Co., Inc. meets their commitments."

HILTON GARDEN INN

ALLENTOWN, PA

The quality craftsmanship demonstrated in every detail of this hotel along with superior customer service is the reason the owners selected Brechbill & Helman. This is the 4th hotel we have built for the owners.

FAIRFIELD INN

CHAMBERSBURG, PA

"We built through a cold, snowy winter and a very wet spring and summer, yet, Mr. Kissel, the job superintendent, was able to keep the job moving along. He got the best out of his subcontractors and staff and always maintained a good, positive attitude. Mr. Dan Nagl, from the Marriott Corporation, has nothing but compliments for the quality of our construction. We feel the same way!"

-Reuven Uberman, C.M. Uberman Enterprises

Brechbill & Helman Construction Co., Inc., negotiated this three-story, 74-unit Fairfield Inn with C.M. Uberman Enterprises. B&H's project management team was able to effectively coordinate and prudently schedule both staff and subcontractor efforts while maintaining a high level of craftsmanship.

SLEEP INN

HAGERSTOWN, MD

This 4-story, 96-room Sleep Inn & Suites is located just off Interstate 70 in Hagerstown, Maryland. The EIFS is appealing to passing motorists, making the hotel a popular stay. HAMPTON INN

CHAMBERSBURG, PA

This project was constructed in two phases with a combined total of 61,800 SF and 124 rooms. Brechbill & Helman utilized load bearing masonry with a precast plank floor system in erecting the three-story structure. An “Exterior Insulation & Finish System” complemented by a standing seam façade roof system provided for a clean appearance with low long term maintenance.

The large and elegant lobby, complete with lounge as well as the registration area is easily accessible from the all weather drive-thru canopied entranceway. Brechbill & Helman’s quality interior craftsmanship insured a professional and pleasing environment.

“I would like to take this opportunity to ‘thank you and your staff’ for ensuring that our facility was built to standards and level of craftsmanship that we have come to expect from Brechbill & Helman.”
-Richard Pellegrino, Secretary/ General Manager, Falling Springs Corporation
